FEMININE HYGIENE BIN Intima Model

- Innovative and compact
- 15L & 23L sizes in slim design
- Foot pedal, electronic & manual models
- Innovative reversible cover to ease location in cubicle
- Designed throughout to minimise dirt traps
- Flexible liner fitting system

SOAP DISPENSER Sanitex® Model

- Available with either a liquid, foam or spray pump
- Range of high quality, PH balanced, pleasantly perfumed soap refill options, including luxury, antibacterial or waterless instant hand sanitizer
- Easy to change pouch refill for quick and contamination free installation

TOILET SEAT SANITIZER Safeseat® Model

- Easy to use, providing the opportunity to clean and sanitize surfaces such as toilet seats effectively before use
- Mildly perfumed, ultra quick drying chemical, allows use of facilities immediately after sanitizing
- Suitable for up to 3000 cleaning operations
- Easy to change pouch refill for quick and contamination free installation

AIR FRESHENER Airoma® Model

- Automatic aerosol fragrance dispensers, ideal in a variety of locations for instant freshness and use against malodours
- Flexible programming options allowing fragrance delivery to be matched to location conditions
- Facility to programme up to 3 additional periods per day of enhanced fragrance delivery
- Visual warning and countdown clock to next spray
- Wide range of fragrances available

NAPPY BIN

- Manual and foot pedal models available
- Heavy duty 30L capacity bin

URINAL / WC SELF-DOSING SYSTEM Quadrasan® Model

- Works continually to ensure urinal and W.C. fixtures are clean, sanitized and odour free
- Choice of either chemical or biological refill options
- Flexible programming options allowing delivery to be matched to location conditions
- Facility to programme up to 3 additional periods per day of enhanced chemical delivery

WATER MANAGER Magnum Model

- Designed to control and reduce by over 70%, the water used in automatic flushing urinal systems
- When a person enters the washroom an infra-red detector senses body movement, which operates a timer and valve controlling water supply to the cistern
- If the toilets are not used for 12 hours, then a single hygiene flush takes place
- A typical 9 litre cistern, flushing 4 times per hour every hour will use 6,048 litres per week. After installation of a water manager, in a typical commercial building this would be reduced to 1,440 litres.

TOILET TISSUE DISPENSER Jumbo Model

- Accommodates an internal roll core diameter between 56-62 mm
- External roll diameter up to 280mm

HAND DRYER Magnum Multi-dri Model

- Warm air hand and face dryer
- Chromed aluminium swivel nozzle
- Standard power touch - 1.8kw
- Turbo power touch - 2kw
- Standard power automatic - 1.8kw
- Turbo power automatic - 2kw
- Variety of models available including quiet running

AIR FRESHENER FRAGRANCES

- We offer a full range of fragrances, suitable for both inside and outside the wash-room environment.
